- LARGE EXTENSION TABLE
- 10 LANGUAGES AVAILABLE ON SCREEN
- ELECTRONIC FOOT CONTROL
- SEWING LIGHT
- SOFT DUST COVER

» 135 STITCHES ACROSS FOUR MODES

The MC6500P stitch collection ranges from utility to decorative, encompassing beautiful quilting and heirloom stitches, such as the unique French Knot. The selections are divided into four quick-access modes: Direct, Quilt, Utility, and Monogramming. The Quilt Mode alone has 69 patterns to choose from, including 4 hand-look stitches.

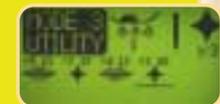

» SEVEN BUTTONHOLES TO CHOOSE FROM

The MC6500P features 7 advanced Janome buttonholes. Six are one-step, sensor buttonholes – perfectly sized every time. The seventh is an Automatic buttonhole, perfect for bulky or other difficult fabrics that demand a custom touch. Choose from square, rounded, keyhole and more.

» TWO STYLES OF LETTERING, IN TWO SIZES

Select Block or Script in 5mm or 7mm and enter up to 50 characters. Each alphabet includes capital and lower case letters, and alternate letters used in foreign alphabets.

» EASY ON-SCREEN STITCH MANIPULATION

Four modes give you customizing power over 135 stitches, including block and script monogramming, and seven buttonholes.

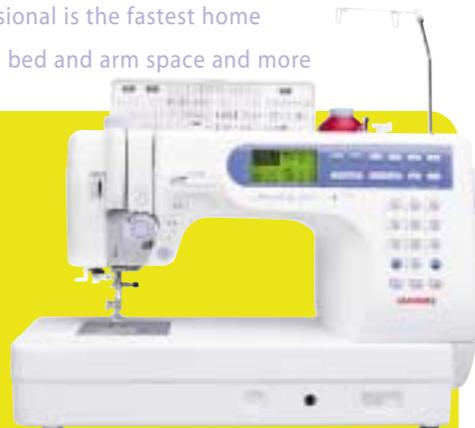

» WIND YOUR BOBBINS WITHOUT UNTHREADING

The Bobbin Winding Motor functions independently of the sewing motor, so you don't have to re-thread in the middle of your work.

» CUSTOMIZE YOUR STITCHES

Don't see the exact stitch you want? Then alter a pre-set stitch to create your own! Stitches can be elongated, flipped and combined with other stitches, then saved into the Recall Memory Bank. Adjust stitch width from 0 to 7mm. Adjust length from 0 to 5mm. Center needle and left needle straight stitches can be programmed in increments of 1, 3, or 5 stitches.

» **SEW AT UP TO 1000 STITCHES PER MINUTE**
Long seams will flash by with perfect Janome stitch quality. Run straight stitches at up to 1000 spm. The MC6500P can also do Zig-zag at up to 700 spm.

» **BIGGER IS BETTER**
At 9" x 5" (225mm x 120mm), it has the largest arm and bed space of any household sewing machine. And, it comes standard with a generous extension table for even more room.

» **DON'T REACH FOR THOSE SNIPS**
Janome's first-ever Automatic Thread Cutter is the ultimate time and motion saver. It can be programmed into the end of your stitch combinations.

The Memory Craft For Serious Sewing

The Memory Craft 6500 Professional is a step up from the usual home sewing machine. It provides the speed and precision critical to advanced sewing.

In fact, everything about the MC6500P is designed to help you complete your projects faster and with better results — whatever type of sewing you're interested in. Quilting is a breeze with the knee lift, extra large arm and bed space, and easy-access to drop or raise the feed-dogs. Features like the Visible Pressure Gauge and precise speed control make garments come together with an expert finish. Blazing stitch speed and the awesome specialty stitches will help you get more home dec done in less time. If you're serious about sewing, this is your machine.

» **BUILT FOR SPEED**
With a straight stitch speed of up to 1000 stitches per minute, the MC6500P is the fastest home sewing machine we've ever made, which means you can finish what you start quickly and easily.

» **AUTOMATIC THREAD CUTTER**
Now there's no need to stop, lift the presser foot, and manually cut your thread tails. A Quick Key directly above the needle engages the Automatic Thread Cutter and accurately snips your thread. You can also program the machine to clip your thread at the end of a custom stitch sequence.

» **JANOME STITCH QUALITY**
From automatic buttonholes to the French Knot, all your stitching will have beautiful Janome quality. The combination of a powerful motor and precision gearing gives you accurate, professional grade stitching at any speed, on any fabric.

Exercise Your Freedom To Create

You have the speed. You have the control. You have the freedom to create projects that turn out exactly the way you want.

» **QUICK-FLIP STITCH CHART**
All 135 stitches are easy to find on a clever flip chart that folds up from the back of the machine.

« **PRESSURE REGULATOR WITH VISIBLE PRESSURE GAUGE**
Sometimes bulky layers of fabric need more pressure from the foot; sometimes sheer fabrics need less. The MC6500P lets you control how firmly the foot is pressing on your fabric. The Visible Pressure Gauge shows you the exact position of your ideal setting so you can get the same results every time.

« **HANDY SHORTCUTS AT YOUR FINGERTIPS**
Automatic Thread Cutter, Needle Up/Down, Lock Stitch and Reverse Quick Keys are all within easy reach right above the sewing area. Plus, the Automatic Thread Cutter and Needle Up/Down keys have indicator lights, so you never have to guess if they're turned on.

« **EASY NEEDLE THREADER**
Another great time-saving feature to get you sewing faster. Just push down the lever, loop the thread through, release, and you're ready to sew.

» **MORE NEEDLE POSITIONS**
Janome is known for precision stitch quality, but the MC6500P takes it to the next level. With 71 total needle drop positions (including 15 left to right needles positions), your decorative stitches have the detail and quality you expect and deserve.

» **BRIGHT LCD SCREEN**

» **DUAL THREAD GUIDE BAR**
Accommodates a variety of spool types and sizes.

» **INDEPENDENT BOBBIN WINDER**
Now, when you need to wind another bobbin, you don't have to stop and unthread the machine. The MC6500P is the first Janome with an Independent Bobbin Winding Motor. Wind your bobbin while you keep sewing.

» **TWIN NEEDLE GUARD**
Automatically sets and prevents decorative stitch widths from being set too wide for Twin Needle applications

» **ERGONOMIC AND INTUITIVE DESIGN**
Easy-access, raised keys and a bright, clear LCD screen give you efficient navigation through all the machine's operations. Press a key and the screen displays everything you need to know about the stitch or function. Giant stitch diagrams pop up to confirm your stitch selection. For additional information or options, simply press the Help key.

» **TURN-OVER MEMORY**

» **9" x 5" (225mm x 120mm)**
The largest arm and bed space of any household sewing machine.

» **KNEE LIFTER**
It lifts the presser foot while leaving the needle in place so you can keep your hands on your work. A favorite feature of quilters, it's also very useful for garment and home dec projects. And just in case you accidentally bump the lift while you're sewing, the MC6500P has a built-in safety feature that stops the machine and gives you a warning, so you don't break a needle or ruin your project.

» **EASY ACCESS FEED DOG CONTROL**
For quilting or other free-motion sewing, you can quickly drop the feed dogs. The lever is right on the front of the machine.
