Hi Michael, I am really interested in the ASR. Is compatible with MC12000? I love my 12000 and don't need an upgrade to one of the beautiful new machines but I'd love to have the ASR.

HI Roberta! The Janome A.S.R. (Accurate Stitch Regulator) is only compatible with the Janome CM17 (the machine it debuted with) the NEW MC9480 QC Professional (is available as an optional accessory) and the NEW Continental M8. There is no way to retrofit it into older machines.

Thank you for sharing the Janome love!

How much do I want to trade my M7 for the M8? I'm certainly thinking about this. Look forward to seeing you in Humboldt in a little over a month.
